## OBJECTIVE

Proactive and detail-oriented Computer Science Engineer with a good foundation in full-stack web development, including proficiency in Java, JavaScript, HTML5, CSS3, and MySQL, as well as experience in Android development. Eager to apply my technical skills and passion for software engineering to contribute to innovative projects at a leading IT company.

## WORK EXPERIENCE

### INTERNSHIPS

**TECHVEEL** May 2023 - Mar 2024

- Throughout my internship, I learned Java Full-Stack Development under the guidance of real-time industry experts, gaining a solid foundation in both theoretical concepts and practical applications.
- I developed proficiency in a range of technologies, including HTML, CSS, Java, JavaScript, Bootstrap, and MySQL, enabling me to effectively contribute to complex web development projects

**UNIQ TECHNOLOGIES** May 2023

- I learn about Android Development and build a third party dialling app using xml and java.
- I learned industry standard tool and best practices in Android studio & Visual studio.

## EDUCATION

**B.E CSE || Oct 2020 - May 2024**

GRT Institute of Engineering and Technology  
CGPA : 8.42(Upto 6th sem)

**HSC || Mar 2020**

Sri Ramakrishna BHEL Hr.Sec  
Mark : 70%

**SSLC || April 2018**

Queen Mary's Matric school  
Mark : 84%

## HARD SKILLS

- Java
- Javascript
- HTML5
- CSS3
- BOOTSTRAP5
- MySQL

## SOFT SKILLS

- Time Management
- Team work
- Active Listener
- communication

## COURSE WORK

### UNDERGRADUATE

- Interenet programming
- OOPS in java
- Data Structure
- Data Base Management System

## CERTIFICATES AND TRAININGS

- Full Stack development. May 2023 - Mar 2024
- CCNA- introduction to network. Sep 2022
- Typewriter senior Feb 2022
- GDSC Cloud challengers Programme

## ACADEMIC PROJECTS

**To-Do** July 2022

- During my fourth semester of my degree, I developed an application using Java that includes features such as adding, deleting, and updating items in a todo list.

**TOURISM MANAGEMENT SYSYTEM** July 2023

- I developed a Travel Management System (TMS) project during my degree, aimed at simplifying the process of booking tour packages for customers online, eliminating the need for offline methods or intermediaries.
- The system was built using HTML, CSS, PHP, and MySQL, and hosted locally on XAMPP server.
